## STANLEY SCRAPER PLANES.

### DOUBLE HANDLE VENEER SCRAPER PLANES.

The handles are of rosewood with a double grip, and, being placed across the center of the tool, give it a good balance. The blades are adjustable endwise and for angle, and can be firmly locked in position desired.

They can also be used as Tothing Planes, doing excellent work in scraping off old paint or glue, and in roughing up the surface of wood preparatory to veneering same. For price of tothing cutters see below.

No. 12 has for many years been the standard for Scrapers of this design. No. 12½ is the same except that it has an extra bottom, or face, made of rosewood. This wood bottom is especially adapted for use on very fine work, as it renders less liable the possibility of marring or scratching the surface being worked upon. This bottom is detachable, and, when worn, can be readily removed and a new one substituted.

No. 12¼ is the same style as No. 12 but is smaller, consequently lighter, and has a narrower blade. An excellent tool for light work.

						Each
No. 12	6¼ in. long	3 in. Blade	Japanned	Iron Face	Wgt. 3¼ lbs.	\$2 40
12½	6¼ " "	3 " "	" "	Rosewood Face	" 4 " "	3 20
12¼	6¼ " "	2 " "	" "	Iron Face	" 2½ " "	2 00

### CABINET MAKERS SCRAPER PLANES.

When in use the blade rests against the front edge of the mouth under a slight pressure. In working, the blade springs backward, opening the mouth and allowing the shaving to pass through it. As soon as working pressure is released the blade springs back to its normal position. Made in two styles, one, a Rabbet Scraper with handle and knob pivoted, to allow tilting for convenience when working into corners or up against perpendicular surfaces, and the other, without a rabbet mouth and with stationary handle and knob. Handles and knobs of rosewood.

					Each
No. 35	8 in. long	2 in. Blade	Rabbet Mouth	Tilt'g Hdle. & Knob	Wgt. 2¾ lbs. \$2 30
87	8 " "	2 " "	Regular Mouth	Stationary " " "	2½ " 2 00

### SINGLE HANDLE VENEER SCRAPER PLANES.

The No. 112 has a rosewood handle and knob, having the same form as the regular "Bailey" Plane, and is preferred by some users to the two-handle or double grip form of Scraper Plane.

The blades are adjustable endwise and for angle, and can be firmly locked in position desired. It can also be used as a Tothing Plane, doing excellent work in scraping off old paint or glue, and in roughing up the surface of wood preparatory to veneering same. For price of tothing cutters, see below.

No. 212 is a small handy tool, designed to be used with one hand and well adapted for Violin Makers and all Mechanics requiring a light adjustable scraper. It has a rosewood knob but no handle. It also has the "Hand-y" feature on both sides.

				Each
No. 212	5½ in. long	1½ in. Blade	Japanned	Wgt. 1½ lbs. \$1 50
112	9 " "	3 " "	" 4 " "	2 10

## STANLEY HAND SCRAPERS.

These Scrapers are made of high grade English steel, and great care is taken to give them a special temper for this work.
